

Models for Operating Rooms and Surgery Centers

The Tuttnauer line of healthcare sterilizers are designed for hospital operating rooms, central sterile supply departments, ambulatory surgery centers, dental schools, and other clinical settings. FDA cleared, the autoclaves come standard with immediate use, wrapped and unwrapped cycles, to satisfy all sterilization needs in the healthcare market. Two test cycles are also included.

All sterilizers are equipped with reliable non-proprietary components, maximizing "uptime" while providing an ultra low total cost of ownership. Autoclaves continue to be the first line of defense against infection and Tuttnauer takes this responsibility seriously.

BacSoft Color Screen Control System

User-friendly interface with printer and USB port for transferring cycle data all come standard.

**Optional R.P.C.R Software*
